ELSEVIER

Thin Solid Films 367 (2000) 308–312

thin solid films

www.elsevier.com/locate/tsf

Subject Index of Volume 367

AlGaAs photoluminescence
Analysis of photoluminescence efficiency and surface recombination velocity of MBE-grown AlGaAs layers, 180
Atom optics
Laser-focused atomic deposition – nanofabrication via atom optics, 25
Atomic force microscopy
MBE-growth peculiarities of fluoride (CdF_2–CaF_2) thin film structures, 112
The elastic strain and composition of self-assembled GeSi islands on Si(001), 171
Lateral and depth inhomogeneities in Zn-based heterostructures grown on GaAs by MBE, 184
Manganese fluoride epitaxial growth on Si(111), 199
Atomic layer epitaxy
Equilibrium shape of steps and islands on polar CdTe(001) surface: application to the preparation of self organized templates for growth of nanostructures, 48

Capacitance spectroscopy
Single-electron charging of self assembled quantum dots, 93
Carbon-containing Si/Ge alloy
MBE growth and properties of supersaturated, carbon-containing silicon/germanium alloys on Si(001), 101
CdTe/ZnTe multiple quantum wells
Influence of MBE growth conditions on optical properties of CdTe/ZnTe quantum structures, 210
Characterization of molecular beam epitaxy grown films
Auger electron spectroscopy in the investigation of ultrathin films in molecular beam epitaxy, 126
Charge carriers transport in mechanically relaxed epilayers
Growth and transport properties of relaxed epilayers of InAs on GaAs, 232
CMOS technology
SiGe – heterostructures for CMOS technology, 250
Computer simulations
A simple solid-on-solid model of epitaxial thin films growth: inhomogeneous multilayered sandwiches, 28
Computer simulations of the transport and electromagnetic properties of MBE-grown quantum structures, 295
Critical thickness of the epilayer
Correlation between the critical layer thickness and the decay-time constant of RHEED oscillations in strained $In_xGa_{1-x}As/GaAs$ structures, 302
Crystallization of GaN under high N_2 pressure
GaN substrates for molecular beam epitaxy growth of homo-epitaxial structures, 281

Current–voltage characteristics
MBE-grown gate-controlled quantum-dot nanostructure and its current–voltage characteristics, 97

Device with side-gated quantum wires
Transport spectroscopy of quantum wires and superlattices, 267
Diffusion processes in cation sublattice
Cation diffusion in MBE-grown CdTe layers, 220
Diluted magnetic semiconductors
Reflectance difference spectroscopy: a powerful tool for in situ investigations of II–VI compounds with Mn, 216
Directional Auger electron spectroscopy
Auger electron spectroscopy in the investigation of ultrathin films in molecular beam epitaxy, 126
Dopant diffusion in $Si_{1-x-y}Ge_xC_y$
MBE growth and properties of supersaturated, carbon-containing silicon/germanium alloys on Si(001), 101
Doping of GaN crystals
GaN substrates for molecular beam epitaxy growth of homo-epitaxial structures, 281

Electron holography
Structure and electronic properties of ionic nano-layers MBE-grown on III–V semiconductors, 134
Electron transport spectroscopy
Transport spectroscopy of quantum wires and superlattices, 267
Epitaxial films
Manganese fluoride epitaxial growth on Si(111), 199

Fermi level pinning
MBE growth and applications of silicon interface control layers, 58
First-principles total-energy calculations
Imaging wurtzite GaN surfaces by molecular beam epitaxy-scanning tunneling microscopy, 149

GaAs tera-hertz devices grown by molecular layer epitaxy
Molecular layer epitaxy, 13
GaAs:Te solid solution
Local order of Te impurity atoms and free electron concentration in heavily doped GaAs:Te, 227
Gadolinium epitaxial thin films
Magnetic anisotropy in MBE-grown epitaxial gadolinium ultrathin films, 189
Germanium
Molecular beam epitaxy of silicon–germanium nanostructures, 75

PII: S0040-6090(00)00962-7

Gold adsorption on Si(111) surface
UHV-REM study of gold adsorption on the Si(111) surface, 142

Hall effect measurements
Growth and transport properties of relaxed epilayers of InAs on GaAs, 232
Heavily doped semiconductors
Local order of Te impurity atoms and free electron concentration in heavily doped GaAs:Te, 227
Heteroepitaxy
Molecular beam epitaxy of silicon–germanium nanostructures, 75
Heteroepitaxy by molecular beam epitaxy
MBE growth and applications of silicon interface control layers, 58
Heteroepitaxy of II–VI compounds
The heteroepitaxy of II–VI compounds on the non-isovalent substrates (ZnTe/Si), 203
High resolution X-ray diffraction
Influence of Mn content in MBE-grown $Sn_{1-x}Mn_xTe$ layers on their structural properties studied by X-ray diffraction, 168
High-resolution X-ray diffractometry
Growth and transport properties of relaxed epilayers of InAs on GaAs, 232
Historical perspective of molecular beam epitaxy
Fundamental growth processes in the molecular beam epitaxy of III–V compounds – an historical perspective, 3
Homoepitaxy and heteroepitaxy by molecular beam epitaxy
Fundamental growth processes in the molecular beam epitaxy of III–V compounds – an historical perspective, 3
Hut-clusters and dome-islands
The elastic strain and composition of self-assembled GeSi islands on Si(001), 171

III–V semiconductor compounds
Structure and electronic properties of ionic nano-layers MBE-grown on III–V semiconductors, 134
III–V semiconductors
Uniform III–V semiconductor quantum wire and quantum dot arrays by natural self-faceting on patterned substrates, 32
InAs and Si quantum dots
InAs quantum dots embedded in silicon, 85
Injection lasers
Quantum dot lasers: breakthrough in optoelectronics, 235
Intensity oscillations of the reflection high energy electron diffraction specular beam
Correlation between the critical layer thickness and the decay-time constant of RHEED oscillations in strained $In_xGa_{1-x}As/GaAs$ structures, 302
Interfaces
A simple solid-on-solid model of epitaxial thin films growth: inhomogeneous multilayered sandwiches, 28
Interface control layers
MBE growth and applications of silicon interface control layers, 58
Intra-ion transitions
Reflectance difference spectroscopy: a powerful tool for in situ investigations of II–VI compounds with Mn, 216

Laser-focused atom deposition
Laser-focused atomic deposition – nanofabrication via atom optics, 25
Layer-by-layer growth of ultrathin films
Auger electron spectroscopy in the investigation of ultrathin films in molecular beam epitaxy, 126
Local order of impurities
Local order of Te impurity atoms and free electron concentration in heavily doped GaAs:Te, 227
Low energy electron diffraction
Structure and electronic properties of ionic nano-layers MBE-grown on III–V semiconductors, 134
Low-temperature atomic layer epitaxy
Formation and properties of self-organized II–VI quantum islands, 68

Magnetic phase transitions
Structural properties of MBE grown GaMnAs layers, 165
Magnetic structures
A simple solid-on-solid model of epitaxial thin films growth: inhomogeneous multilayered sandwiches, 28
Magnetization in thin films
Magnetic anisotropy in MBE-grown epitaxial gadolinium ultrathin films, 189
Magneto-optical properties of quantum wells
Magneto-optical properties of CdTe quantum wells with ternary MgMnTe and quaternary CdMnMgTe barriers, 223
Material contrast in reflection high-energy electron diffraction patterns
Investigations on the growth mechanism of wide-gap II–VI semiconductors by means of reflection high energy electron diffraction, 159
Mechanisms of molecular beam epitaxy growth of $Si_{1-x}Ge_x$ alloys
Strain-relaxed SiGe/Si heteroepitaxial structures of low threading-dislocation density, 120
Metallic thin films
Magnetic anisotropy in MBE-grown epitaxial gadolinium ultrathin films, 189
MnF_2 growth by molecular beam epitaxy on $CaF_2/Si(111)$ substrates
Manganese fluoride epitaxial growth on Si(111), 199
Molecular beam epitaxy
Uniform III–V semiconductor quantum wire and quantum dot arrays by natural self-faceting on patterned substrates, 32
Molecular beam epitaxy of silicon–germanium nanostructures, 75
InAs quantum dots embedded in silicon, 85
Structure and electronic properties of ionic nano-layers MBE-grown on III–V semiconductors, 134
Lateral and depth inhomogeneities in Zn-based heterostructures grown on GaAs by MBE, 184
The heteroepitaxy of II–VI compounds on the non-isovalent substrates (ZnTe/Si), 203
Pyrometric interferometry during MBE growth of laser heterostructures, 299
Molecular beam epitaxial growth
MBE growth and properties of supersaturated, carbon-containing silicon/germanium alloys on Si(001), 101

Molecular beam epitaxial growth interruption effects
Influence of MBE growth conditions on optical properties of CdTe/ZnTe quantum structures, 210
Molecular beam epitaxy growth mechanisms of thin film structures
MBE-growth peculiarities of fluoride (CdF_2–CaF_2) thin film structures, 112
Molecular beam epitaxial growth modes
Transition thickness of semiconductor heteroepitaxy, 277
Molecular beam epitaxy growth of CdTe
Cation diffusion in MBE-grown CdTe layers, 220
Molecular beam epitaxial growth of CdTe quantum wells
Magneto-optical properties of CdTe quantum wells with ternary MgMnTe and quaternary CdMnMgTe barriers, 223
Molecular beam epitaxy growth of CdYbTe
Electronic structure of MBE grown CdYbTe: photoemission studies, 193
Molecular beam epitaxy growth of embedded heterostructures
Growth and electrical characteristics of InAs/GaAs quantum well and quantum dot structures, 89
Molecular beam epitaxy growth of GaInP/AlGaInP and GaInP/GaAs heterostructures
Growth of resonant cavity quantum well light emitting diodes and two-junction solar cells by solid source molecular beam epitaxy, 260
Molecular beam epitaxy growth of GaMnAs
Structural properties of MBE grown GaMnAs layers, 165
Molecular beam epitaxial growth of GeSi nanoislands
The elastic strain and composition of self-assembled GeSi islands on Si(001), 171
Molecular beam epitaxial growth of homoepitaxial GaN layers
GaN substrates for molecular beam epitaxy growth of homoepitaxial structures, 281
Molecular beam epitaxial growth of II–VI compounds
Investigations on the growth mechanism of wide-gap II–VI semiconductors by means of reflection high energy electron diffraction, 159
Molecular beam epitaxial growth of InAs on GaAs
Growth and transport properties of relaxed epilayers of InAs on GaAs, 232
Molecular beam epitaxial growth of SnMnTe
Influence of Mn content in MBE-grown $Sn_{1-x}Mn_xTe$ layers on their structural properties studied by X-ray diffraction, 168
Molecular beam epitaxial growth of strained heterostructures
Correlation between the critical layer thickness and the decay-time constant of RHEED oscillations in strained $In_xGa_{1-x}As/GaAs$ structures, 302
Molecular beam epitaxial growth physics
Fundamental growth processes in the molecular beam epitaxy of III–V compounds – an historical perspective, 3
Molecular beam epitaxial multi-chamber growth/processing/characterization system
MBE growth and applications of silicon interface control layers, 58
Molecular beam epitaxial quantum nanostructures
Computer simulations of the transport and electromagnetic properties of Molecular beam epitaxial-grown quantum structures, 295
Molecular beam epitaxy of CdF_2–CaF_2 superlattices
MBE-growth peculiarities of fluoride (CdF_2–CaF_2) thin film structures, 112
Molecular beam epitaxy of GaAs, ALGaAs, ALAs
Selective area MBE of GaAs, A1As and their alloys by periodic supply epitaxy, 6
Molecular beam technology growth of Bragg reflectors
MBE growth of planar microcavities with distributed Bragg reflectors, 290
Molecular layer epitaxy of GaAs, InP and Si
Molecular layer epitaxy, 13

Nanostructures
Reflectance difference spectroscopy: a powerful tool for in situ investigations of II–VI compounds with Mn, 216
Nanotechnology
Laser-focused atomic deposition – nanofabrication via atom optics, 25
Equilibrium shape of steps and islands on polar CdTe(001) surface: application to the preparation of self organized templates for growth of nanostructures, 48

Optoelectronics
InAs quantum dots embedded in silicon, 85

Passivation by interface control layer
Analysis of photoluminescence efficiency and surface recombination velocity of MBE-grown AlGaAs layers, 180
Patterned growth
Uniform III–V semiconductor quantum wire and quantum dot arrays by natural self-faceting on patterned substrates, 32
Periodic supply epitaxy
Selective area MBE of GaAs, A1As and their alloys by periodic supply epitaxy, 6
Perpendicular magnetic anisotropy
Magnetic anisotropy in MBE-grown epitaxial gadolinium ultrathin films, 189
Photoluminescence
Influence of MBE growth conditions on optical properties of CdTe/ZnTe quantum structures, 210
Planar microcavities
MBE growth of planar microcavities with distributed Bragg reflectors, 290
Pseudomorphic Si/SiGe/Si heterostructures
SiGe – heterostructures for CMOS technology, 250
Pyrometric interferometry
Pyrometric interferometry during MBE growth of laser heterostructures, 299

Quantum dots
Uniform III–V semiconductor quantum wire and quantum dot arrays by natural self-faceting on patterned substrates, 32
Quantum dots formed by ultrathin insertions in wide-gap matrices, 40
Equilibrium shape of steps and islands on polar CdTe(001) surface: application to the preparation of self organized templates for growth of nanostructures, 48
Molecular beam epitaxy of silicon–germanium nanostructures, 75
Growth and electrical characteristics of InAs/GaAs quantum well and quantum dot structures, 89

Quantum dot lasers: breakthrough in optoelectronics, 235
Quantum wells
Growth and electrical characteristics of InAs/GaAs quantum well and quantum dot structures, 89
Quantum wires
Uniform III–V semiconductor quantum wire and quantum dot arrays by natural self-faceting on patterned substrates, 32
Equilibrium shape of steps and islands on polar CdTe(001) surface: application to the preparation of self organized templates for growth of nanostructures, 48

Raman spectroscopy
The elastic strain and composition of self-assembled GeSi islands on Si(001), 171
Reflectance difference spectroscopy
Reflectance difference spectroscopy: a powerful tool for in situ investigations of II–VI compounds with Mn, 216
Reflection high energy electron diffraction
Investigations on the growth mechanism of wide-gap II–VI semiconductors by means of reflection high energy electron diffraction, 159
Resonant cavity light emitting diodes
Growth of resonant cavity quantum well light emitting diodes and two-junction solar cells by solid source molecular beam epitaxy, 260

Scanning tunneling microscopy
Equilibrium shape of steps and islands on polar CdTe(001) surface: application to the preparation of self organized templates for growth of nanostructures, 48
Imaging wurtzite GaN surfaces by molecular beam epitaxy-scanning tunneling microscopy, 149
Secondary ion mass spectrometry
Cation diffusion in MBE-grown CdTe layers, 220
Selective area epitaxy
Selective area MBE of GaAs, A1As and their alloys by periodic supply epitaxy, 6
Self organization phenomena
Equilibrium shape of steps and islands on polar CdTe(001) surface: application to the preparation of self organized templates for growth of nanostructures, 48
Self-assembled quantum dots
Formation and properties of self-organized II–VI quantum islands, 68
Self-organization in epitaxy
Molecular beam epitaxy of silicon–germanium nanostructures, 75
Self-organized growth in molecular beam epitaxy
Quantum dot lasers: breakthrough in optoelectronics, 235
Self-organized quantum dots
Single-electron charging of self assembled quantum dots, 93
Semiconductor low-dimensional structures
Quantum dots formed by ultrathin insertions in wide-gap matrices, 40
Semiconductor nanostructures
Single-electron charging of self assembled quantum dots, 93
MBE-grown gate-controlled quantum-dot nanostructure and its current–voltage characteristics, 97
Semiconductor–insulator interface
Structure and electronic properties of ionic nano-layers MBE-grown on III–V semiconductors, 134
Silicon
Molecular beam epitaxy of silicon–germanium nanostructures, 75
Si(113):As substrates
The heteroepitaxy of II–VI compounds on the non-isovalent substrates (ZnTe/Si), 203
SiGe heterostructures
SiGe – heterostructures for CMOS technology, 250
SiGe/Si heteroepitaxy by molecular beam epitaxy
Strain-relaxed SiGe/Si heteroepitaxial structures of low threading-dislocation density, 120
Single-electron transport
MBE-grown gate-controlled quantum-dot nanostructure and its current–voltage characteristics, 97
Static induction transistor technology
Molecular layer epitaxy, 13
Step bunching caused by electric current heating
UHV-REM study of gold adsorption on the Si(111) surface, 142
Stepwise buffer layers
Strain-relaxed SiGe/Si heteroepitaxial structures of low threading-dislocation density, 120
Strongly coupled superlattice
Transport spectroscopy of quantum wires and superlattices, 267
Structural investigations by reflection high energy electron diffraction
Structural properties of MBE grown GaMnAs layers, 165
Superlattices of Si_nGe_m material system
Ultra low energy SIMS, XTEM and X-ray diffraction methods for the characterization of a MBE grown short period $(Si_nGe_m)_{16}$ superlattices, 176
Surface charge carriers recombination
Analysis of photoluminescence efficiency and surface recombination velocity of MBE-grown AlGaAs layers, 180
Surface migration of adsorbates
UHV-REM study of gold adsorption on the Si(111) surface, 142
Surface passivation
MBE growth and applications of silicon interface control layers, 58
Surface roughness
A simple solid-on-solid model of epitaxial thin films growth: inhomogeneous multilayered sandwiches, 28
Surface state density
Analysis of photoluminescence efficiency and surface recombination velocity of MBE-grown AlGaAs layers, 180
Surface structure
Structure and electronic properties of ionic nano-layers MBE-grown on III–V semiconductors, 134
Surfactant-mediated epitaxy
The heteroepitaxy of II–VI compounds on the non-isovalent substrates (ZnTe/Si), 203
Surfactant-mediated Molecular beam epitaxy
Formation and properties of self-organized II–VI quantum islands, 68

Ternary and quaternary barrier layers

Magneto-optical properties of CdTe quantum wells with ternary MgMnTe and quaternary CdMnMgTe barriers, 223
Thermodynamic approach to theory of epitaxial growth
Transition thickness of semiconductor heteroepitaxy, 277
Transistor structures
MBE growth and applications of silicon interface control layers, 58
Transition thickness from 2D to 3D growth
Transition thickness of semiconductor heteroepitaxy, 277
Transmission electron microscopy
Ultra low energy SIMS, XTEM and X-ray diffraction methods for the characterization of a MBE grown short period $(Si_n$-$Ge_m)_{16}$ superlattices, 176
Transport and electromagnetic properties of quantum wells
Computer simulations of the transport and electromagnetic properties of MBE-grown quantum structures, 295
Two-junction cascade solar cells
Growth of resonant cavity quantum well light emitting diodes and two-junction solar cells by solid source molecular beam epitaxy, 260

Ultra-low energy secondary ion mass spectrometry
Ultra low energy SIMS, XTEM and X-ray diffraction methods for the characterization of a MBE grown short period $(Si_n$-$Ge_m)_{16}$ superlattices, 176
Ultrathin-layer insertions in wide-gap semiconductors
Quantum dots formed by ultrathin insertions in wide-gap matrices, 40
UV resonant photoemission
Electronic structure of MBE grown CdYbTe: photoemission studies, 193

Vertical cavity surface emitting lasers
MBE growth of planar microcavities with distributed Bragg reflectors, 290
Pyrometric interferometry during MBE growth of laser heterostructures, 299

Wurtzite GaN
Imaging wurtzite GaN surfaces by molecular beam epitaxy-scanning tunneling microscopy, 149

X-ray diffraction and photoemission spectroscopy
Structural properties of MBE grown GaMnAs layers, 165
X-ray diffraction
The elastic strain and composition of self-assembled GeSi islands on Si(001), 171
Ultra low energy SIMS, XTEM and X-ray diffraction methods for the characterization of a MBE grown short period $(Si_n$-$Ge_m)_{16}$ superlattices, 176
Lateral and depth inhomogeneities in Zn-based heterostructures grown on GaAs by MBE, 184
X-ray diffuse scattering
Local order of Te impurity atoms and free electron concentration in heavily doped GaAs:Te, 227
X-ray photoemission
Electronic structure of MBE grown CdYbTe: photoemission studies, 193

Zn-based heterostructures
Lateral and depth inhomogeneities in Zn-based heterostructures grown on GaAs by MBE, 184
ZnSe films
Lateral and depth inhomogeneities in Zn-based heterostructures grown on GaAs by MBE, 184
ZnTe films
Lateral and depth inhomogeneities in Zn-based heterostructures grown on GaAs by MBE, 184
The heteroepitaxy of II–VI compounds on the non-isovalent substrates (ZnTe/Si), 203
